Internal printing of York University's Mark Glassman, in Canada's Graphic Communications Magazine.

The Publishing department's gargantuan number has become 55,000, the same size as the city's mobile factory, because that's what the students need for a whole host of activities. I'm keen to exchange ideas and meet people at Victoria@printaction.com.

Another common characteristic of in-plants is that they are always looking for new ways to increase efficiencies, decrease costs, and improve the quality of their services. All important customer relations and knowledge are considered key to the success of the in-plant department. From the President and the Higher Education Literacy, the print-on-demand books are often created in-house by the students, who are responsible for the entire process, including design, printing, and delivery. Without the help of these black-and-white presses, smaller Toronto campuses would not be able to produce the high-quality publications they need to support their research and educational goals.

The students provide clients with an exceptional service of delivering printing door-to-door around York's main campus. The printing operation is handled by the students, who are employed by the university. They also have two two-colour offset presses, a Ryobi and an AB Dick. "But we are always looking for new ways to increase efficiencies, decrease costs, and improve the quality of our services." Panagopoulos says one of the more satisfying aspects of the job is being in an environment where students are working side by side with faculty and staff to produce high-quality publications. The students are responsible for the entire process, including design, printing, and delivery. Without their help, the in-plant department would not be able to support the university's research and educational goals.

Glassman holds an MBA and became an expert in printing operations. Among his proudest accomplishments is the creation of the "Inside University In-plants" series, which has been featured in the print industry's top publications. "The series is keen to exchange ideas and meet people at Victoria@printaction.com." The students provide clients with an exceptional service of delivering printing door-to-door around York's main campus.
